

Social Distancing for staff in care settings

Avoid

close contact with other staff.

Distance yourself

at least 2 metres (6 feet away) from other staff including during meetings, handovers and breaks. Wear a Fluid Resistant Surgical Mask if 2 metres distance cannot be maintained.

Do not car share

when travelling to work with people outside of your household. Where absolutely unavoidable a fluid resistant surgical mask should be worn.

Wash Hands

on a regular basis for 20 seconds with soap and water or a hand sanitiser.
